

5v5 Kickball

How it Works! Similar to regular kickball but definitely different. Teams will play two 5-inning games, wearing face masks and remaining socially distanced throughout the game. Game balls will be sanitized each half-inning and hand sanitizer will be provided.

One defender must stand in each of the fielding zones (double, triple, homerun) and a pitcher must pitch from behind the pitching cones. Once the ball is kicked, defenders may move freely.

Kickers will be given three pitches to kick the ball inside the boundary. If a kicked ball lands on the ground that is the result of that player's at bat. However, if a ball strikes the ground in the SINGLE zone, the defense will attempt to roll the ball through the *OUT TARGET* and the runner is out if the roll passes through the target.

Kickers will not run the bases. Ghost runners will be used and will move robotically around the bases. All sacrifice flies will result in runners advancing one base provided it is not the third out of the inning.

Win the game.

Win the league.

Wear the champion's shirts!

It's that easy.
